- **Name* -** Sakthi.R

- **Father Name* -** Ravichandran R

- **Date Of Birth* -** 25-06-2001

- **Address* -** 1/592c, Mella Vittukatti, Lalapet(po), K.R. puram taluka, Karur – 639105

EXPERIENCE:

- Wipro Limited Chennai, Tamil Nadu
- May 2022 – Present

PROJECT DETAILS:

PROJECT - 1

- **Domain -** E-Commerce

- **Periods -** May 2022 To Till Date

- **Client -** Hugo Boss

DESCRIPTION:

Hugo Boss produces high-quality clothing that features modern designs and attention to detail. They offer a wide range of products, including suits, shirts, pants, jackets, and dresses, made from premium materials like wool, silk, and cotton. Accessories Hugo Boss also offers a range of accessories that complement their clothing line. These include leather belts, wallets, ties, scarves, and sunglasses. All of their accessories are designed to be stylish, functional, and durable. Fragrances Hugo Boss is also known for its fragrances, which include a variety of men's and women's scents. Their fragrances range from fresh and light to more intense and sophisticated, with options for different occasions and preferences. Brand image Hugo Boss is often associated with luxury, sophistication, and modernity.

ROLES AND RESPONSIBILITY:

- Automating and managing infrastructure provisioning and deployment processes using tools like Ansible and Terraform on Linux, Ubuntu, and Windows servers.

- Configuring and managing cloud-based resources on AWS, including EC2 instances, VPCs, RDS databases, and S3 buckets.

- Writing and maintaining Python scripts to automate various DevOps tasks such as deployments, monitoring, and scaling.

- Monitoring and maintaining the health and performance of servers, applications, and infrastructure using tools like Nagios, ELK Stack, and Cloud Watch.

- Troubleshooting issues related to application, server, or infrastructure performance, and resolving them in a timely manner.

- Collaborating with development and QA teams to ensure smooth integration and delivery of applications into the production environment.

- Configuring and managing Apache Tomcat web servers, including installation, configuration, and optimization of server settings.

- Ensuring that all infrastructure and applications are up-to-date with the latest security patches and best practices.

- Participating in agile development practices such as daily standups, sprint planning, and retrospectives.

- Continuously learning and keeping up-to-date with new technologies and tools in the DevOps space, and suggesting improvements to existing processes and systems.

TECHNICAL SKILLS:

Operating Systems	- Linux, Ubuntu, Windows
Version Control Tools	- GIT
Source code Management	- GitHub
Continuous Integration Tool	- Jenkins
Configuration Management Tool	- Ansible, Terraform
Containerization Tool	- Docker
Artifactory Server	- Docker hub
Code Coverage Tool	- Sonar Qube
AppServer	- Apache Tomcat
Ticketing Tool	- Jira
Cloud Environments	- AWS
Scripting Language	- Python Scripting

DECLARATION:

I hereby declare that the above-mentioned information is true to the best of my knowledge and belief.
